

# AI Governance Readiness Quiz

## Is Your Business AI-Ready or AI-Exposed?

**Instructions:** Answer each question with **Yes** or **No**. Each **Yes = 1 point**.

1. Do you have a clear list of where AI is currently used in your business?
2. Do you understand what decisions your AI systems influence?
3. Is there a clearly defined owner for each AI system?
4. Is someone accountable for outcomes generated by AI decisions?
5. Do you know what data your AI systems are trained on?
6. Have you assessed your data for bias or gaps?
7. Can your team explain how your AI systems arrive at decisions?
8. Can you justify AI-driven decisions to a customer or regulator if required?
9. Are you aware of regulations that apply to your use of AI?
10. Do you maintain documentation of how your AI systems operate and make decisions?
11. Do you regularly review the outcomes generated by your AI systems?
12. Do you have a process to identify and correct issues quickly?

**Your Score:** \_\_\_\_ / 12

### What Your Score Means

#### 10–12: Strong Readiness

You have clear structures in place to govern AI effectively. Your business is positioned to scale AI responsibly and with confidence.

#### What this means:

You are not just using AI. You are managing it with intent and control.

#### 6–9: Moderate Readiness

You are on the right path, but there are gaps that could create risk as your AI usage grows.

#### What this means:

Your foundation exists, but it needs strengthening to avoid future exposure.

## **0–5: High Exposure**

Your business is likely using AI without sufficient governance structures.

### **What this means:**

You may be gaining short-term efficiency, but at the cost of long-term risk.

### **What to Do Next**

AI governance does not need to be complex. But it does need to be deliberate.

Start with:

- Mapping where AI is used
- Assigning clear ownership
- Reviewing data quality and fairness

If you are looking to move from AI experimentation to structured, compliant adoption, Exactitude International, in collaboration with leading AI experts, supports businesses in building practical and effective AI governance frameworks.
